

MCI project Second Milestone Plan

Team: 08

Project Title: Analyzing the content of README files on GitHub

| Milestone 2 | Activities | Projected Outputs |
|--|---|--|
| Define the second milestone to be completed by end of week 10 | List activities required to achieve 2 nd milestone | Define projected outputs from your work plan |
| The second milestone is to realize all functions of the project required and beautify the interface. | Fix the function of extracting URL. | Currently, the number of URL may present zero, but there are links in the README file. After we have fixed it, which will run successfully. |
| | Realize the function to extract titles. | The project can extract titles from README files, and the result will be listed under the table. |
| | Access the external servers. | External servers will replace the initially internal servers, which means individuals can access to the website wherever they are. |
| | Use CSS to beautify the webpage. | After 2 nd Milestone, the content of webpage will be changed according to the window size, and the style of webpage will be more unification. |
