Present

1. Hangyue Xu
2. I-Sheng Chris Wang

Client: Christoph Treude

Apologies

None

Meeting Procedures

1. Confusion about the project's description

There is a confusion about the content of information in aggregated form. Do we need to let users to download any files if necessary? Normally one project only contained a README files, Licenses, etc. Or do we just need to show an aggregated information on the web application by using the JSON.

Do we need to have our own README files template?

- Synopsis
- Code Example
- Motivation
- Installation
- API reference
- Tests
- Contributors
- License

2. Explanation of the overall project about

Take an example of this website:

<https://github.com/kdn251/interviews/blob/master/README.md#online-judges>

Is that we need to extract every section title into our proposed web application? Like

- Table of Contents
- Online Judges
- Live coding practice
- Data structures
 - Linked list
 - Stack
 - Queue
- Runtime analysis

3. Features of the project:

- a) Create a web application
- b) Randomly selects several GitHub projects.
- c) Extracts section titles from each project and aggregate using the JSON to generate a list.
- d) Extracts links from REAMME files by using a button.

Other Issues

None

Next Meeting

To be confirmed.
